Subject: Photo Surveys of 2 Additional PWD Storm Sewer Outfalls in TTF Watershed

I recently sent you a photo survey of PWD outfall T-080-03. I am now forwarding photo surveys for T-080-02 (Lower Tookany Creek) and T-088-01 (Mill Creek).

It has my understanding that these 3 outfalls are from separate storm sewers, however, in addition to extensive trash found at all 3 outfalls, I have found indications of raw sewage downstream of the last 2 outfall surveys.

I would appreciate the opportunity to review these photo survey survey results with PWD staff before our next Task Force meeting to make sure that I am interpreting the information correctly.
